linkedin.com/in/kritikalpa-saha/

Full-Stack Developer with specialization in Frontend Engineering, bringing 8 years of experience in building scalable, responsive, and user-focused web applications. Skilled in both frontend technologies and backend development, with a proven ability to deliver end-to-end solutions. Adept at collaborating in multicultural teams, optimizing performance, and leveraging AI coding assistants (Claude Code, Antigravity) to accelerate development lifecycles by 70% without compromising code quality.

Experience

MikeLegal, Gurgaon, India

Senior Software Development Engineer

April, 2024 - April, 2026

- Led development of web and mobile applications for the Mike Litigation Tool, driving feature implementation, ensuring code quality through code reviews, and mentoring junior developers and interns.
- Redesigned and optimized UI of the Mike DocCompare Tool to support 6 concurrent document comparisons, improving scalability, performance, and user experience.
- Architected and deployed a Retrieval-Augmented Generation (RAG) pipeline to enhance document comparison accuracy, utilizing vector embeddings to drastically reduce hallucination in legal text analysis.

Software Development Engineer

Dec, 2022 - April, 2024

- Developed the Track Changes module for the product DocReview, enabling lawyers to track real-time contract edits and revisions efficiently.
- Collaborated with other developers to implement the landing page and enhance core features of DocReview.

LongShot AI, Mumbai, India

Senior Frontend Engineer

Dec, 2021 - Dec, 2022

- Built the LongShot Chrome Extension, featured as #2 Product of the Day on Product Hunt, driving visibility and adoption.
- Assisted in fine-tuning open-source LLMs on proprietary datasets to improve domain-specific text generation for users.
- Integrated Semrush APIs into LongShot through direct collaboration with the Semrush team, expanding product functionality and market appeal.
- Revamped the entire application UI in close collaboration with the design team, delivering a modern, user-centric interface and improved user experience with reduced load time by 40%.
- Developed and implemented a real-time collaboration feature using WebRTC, enabling at max 10 users to work simultaneously within the application.
- Maintained, refactored, and optimized the existing codebase, improving stability, performance, and scalability.

Klinify, Singapore

Frontend Engineer

May, 2021 - Oct, 2021

- Developed new independent features from scratch, owning the full lifecycle from architecture and implementation to deployment and performance optimization.
- Reduced technical debt by performing extensive debugging, refactoring, and code cleanups, improving application stability and long-term maintainability.

Capgemini, Mumbai, India

Senior Analyst, React Developer

Sept, 2020 - April, 2021

- Contributed to multiple scalable projects, including an Inventory Management System (IMS) and a Business Process Tracker, delivering reliable and high-performance solutions.
- Translated user requirements into technical specifications, working end-to-end from initial documentation and analysis to final implementation and delivery.

- Implemented unit and integration tests, enhancing code reliability, test coverage, and reducing production bugs.
- Developed interactive UI prototypes to validate design decisions, streamline stakeholder feedback, and accelerate development cycles.

Technical Skills

Languages: Javascript, Typescript, Python, Java, C#, C/C++

Frontend: React, Next.js, React Native, Vue, Tailwind CSS, Redux, React Testing Library (RTL), Jest

Backend: Node.js, Express.js, Django, FastAPI, PostgreSQL, MongoDB

AI & Data: Multi-Agent System, LangChain, LangGraph, RAG, Fine-Tuning, MCP, Prompt Engineering, Vector DB, Pydantic

Architecture & APIs: REST, GraphQL, WebSockets, Microservices, System Design

Cloud & Tools: Git, AWS, GCP, Figma, Claude, Antigravity

Freelance Work

Mobile MVP Development & WhatsApp Integration | Menosense

March, 2026

- Integrated voice-based symptom recording using Whisper (large-v3-turbo) and leveraged Gemini (3-flash) for intelligent summarization, generating structured insights including symptom overview, severity, and mood analysis.
- Implemented WhatsApp integration to allow users to log symptoms and receive updates seamlessly through conversational interfaces, improving accessibility and engagement.
- Built session management features enabling patients to review and update previously recorded symptoms, ensuring continuity and accuracy of health data over time.

Website Development | Balaka Cinema

May, 2021

- Developed a high-fidelity, responsive website for public users, ensuring cross-browser compatibility, mobile-first design, and accessibility compliance.

Restaurant POS system and food menu | Hightree Cafe & Bistro

April, 2021

- Designed and developed customer-facing and back-office application UIs, delivering intuitive, responsive, and user-friendly interfaces that improved overall usability.
- Integrated and synchronized the Order Management System (OMS) with the restaurant menu, ensuring real-time data consistency, operational efficiency, and seamless user experience.

Projects

Adaptive MCP Tool Orchestrator | React, Tailwind, LangGraph, FastAPI, Python mcp SDK, Websockets

April, 2026

A self-correcting AI orchestration engine built on the Model Context Protocol (MCP). It uses a LangGraph state machine to plan, critique, and execute dynamic tool chains across multiple external servers. It features an "Experience Memory" loop to learn from API failures, and a real-time React Flow WebSocket UI to visualize the agent's internal reasoning DAG.

Memory OS | Python, FastAPI, Neo4j, Gemini Pro/Flash, Pydantic, Vector Search, Knowledge Graphs

March, 2026

Built a multimodal pipeline using Gemini to extract entities, emotions, and sentiments, storing them as graph nodes and vectors in Neo4j. Developed a dynamic retrieval system with emotion-weighted scoring and time decay, plus a cron-based pipeline generating high-level behavioral insights.

Education

National Institute of Technology Agartala Bachelor of Technology	Tripura, India 2016-20
Assam Rifles Public School Higher Secondary(CBSE)	Tripura, India 2016
